

Reading, Writing, Mathematics

Start with the teaching and learning that currently takes place in your class/school.

60
minutes
per day

	What this currently looks like in my classroom. <small>(eg: shared writing once a week, reading rotation, etc)</small>	How much time is currently allocated to the intentional teaching in each area in a 'typical week'?	What do I need to change? <small>(eg: more time on writing, intentional learning during integrated learning, etc)</small>	How might I make these changes in a way that works for my ākonga this year? Where might opportunities exist to 'explicitly and intentionally' teach maths and literacy skills in a relevant way?	Evidence <small>for BoT, principal, ERO, parents</small>	In which areas do I think I need support? In which areas might I be able to provide support to others?
